Collins

Introducing the

Hi-Speed® Super Dolly

HSD-G7X

Originally designed for Canada’s harsh off-road winters, the Collins G7X Hi-Speed® Super Dolly is built for extreme conditions, heavy-duty use, and hauling electric vehicles. While the Collins G7 is the ultimate in professional dolly towing, the G7X goes further with iron-packed heavy-duty superpowers for the roadside superhero, tackling the toughest conditions and wrecker jobs.

- **MAXIMUM STRENGTH:** Durable steel hubs and eXtreme capacity steel wheels--the strongest available in the industry.
- **MAXIMUM SPAN:** Only Collins’ patented “True Positive Camber” T12 Hybrid Cross Rails with steel center-cambered inner components and adjustable aluminum outer components can eXtend to 104”.
- **MAXIMUM CAPACITY:** With aggressive, high-traction Load Range E tires, an industry-leading 5,000 lbs capacity, and a 75 mph speed rating, the Collins G7X Super Dolly is perfect for on-road, off-road, and eXpressways, towing eXtreme distances in eXtreme weather.
